

## **Email 11 September 2016 from Barton Willmore re Noise reports**

23955/A3 PF

Tony,

On the revised agenda you sent Wednesday, there were additional points of clarification for two of my clients sites at Langwathby and Appleby relating to noise. For completeness, I attached the noise reports for those two sites that have been provided previously to the Council.

In relation to the agenda comment querying 'atmospheric pollution' in respect of Appleby, I am not aware that Appleby or the site lies within an air quality management area nor have I seen any evidence that there is a particular air quality problem for this site. Air quality management areas exist in Penrith Town Centre at Victoria Rd and Castlegate and also at Eamont Bridge, not at Appleby.

I hope this clarifications will help reduce time at the hearing session.
