

## **Appendix 6 – Measures**

JELD-WEN Penrith will cover the paint line area the same as whole factory by the bi-annually air monitoring programme, for this area they will be additional measures taken in relation to VOC emission – all checks will be done by the external independent company.

Workplace Air Monitoring will cover as described below.

New Paint Line (to be added to the existing report)

- 2 x samples to assess personal exposure and/or background concentrations of Volatile Organic Compounds (Top Five Target Constituents)
- 2 x samples to assess personal exposure and/or background concentrations of Isocyanate
- 2 x samples to assess personal exposure and/or background concentrations of Wood Dust
